SUMMARY

Final-year Computer Science and Design student at SUTD, GICSP-certified and a GIAC Advisory Board Member, focused on OT/ICS security and digital forensics and incident response. Founder of DeskOps, an OT security training platform that applies IEC 62443 zones and conduits and MITRE ATT&CK for ICS, with process design validated by PUB and funding from CSA. Industrial automation experience from Schneider Electric and iTrust, plus hands-on memory and network forensics. Seeking OT/ICS security and DFIR roles, particularly in critical infrastructure; available from June 2027.

PROJECTS

DeskOps, OT Cybersecurity Training Platform, Founder and Project Lead **Sep 2025 to Present**

- Built a 3-VM ICS/SCADA lab mirroring the Purdue Model, with OPNsense firewall rules enforcing the IT/OT boundary and Open vSwitch VLANs segmenting the control network
- Developed 7 attack-and-defend scenarios mapped to MITRE ATT&CK for ICS, in which students exploit an industrial process, then mitigate the risk by applying IEC 62443 zones and conduits
- Engaged stakeholders across government, industry and education: process design validated by PUB, 3 PLCs sponsored by Schneider Electric, a \$7,340 CSA CTDF grant, and workshops scheduled with NYP (Dec 2026) and CSA (Jan 2027)
- Led a 5-person team across curriculum, hardware and software, and coordinated with ITE and the ISC2 Youth Wing

WORK EXPERIENCE

Schneider Electric Asia, System Test Intern **Jul 2025 to Dec 2025**

Industrial Automation

- Supported system testing for EcoStruxure, on the Modicon M262 controller line, on the DevOps and test-automation side
- Diagnosed and resolved a network storm across 4 test grids by segmenting each grid into separate VLANs on a central managed switch, restoring stable multi-grid testing
- Automated software deployment across virtual machines using GitHub Actions to streamline sprint testing

iTrust, Student Researcher **May 2024 to Jan 2025**

Centre of Research for Cybersecurity

- Supported the DevOps and orchestration side of GURU, an OT security education platform built on the SWaT digital twin
- Containerised the digital twin, eliminating recurring compatibility failures that occurred when it ran directly on the host machine
- Automated classroom VM provisioning with Ansible for up to 15 students, and documented the workflow in an SOP
- Gained exposure to industrial protocols including Modbus/TCP and OPC UA

Treehouse Finance, Research Intern **Dec 2022 to May 2023**

Crypto Startup

- Researched and wrote a daily macro and crypto newsletter read by over a thousand users
- Automated the data collection pipeline and built an internal dashboard evaluating projects on relative metrics

EDUCATION

Singapore University of Technology and Design (SUTD) **Singapore**

Bachelor of Engineering (Computer Science and Design)

Sep 2023 to May 2027

- GPA: 4.49/5.0
- SUTD Undergraduate Merit Scholarship

Ngee Ann Polytechnic

Diploma in Engineering Science

Singapore

Aug 2017 to Feb 2020

- GPA: 3.83/4.0

CERTIFICATIONS

- **GIAC Global Industrial Cyber Security Professional (GICSP)**, ICS/SCADA security across IT, OT and engineering disciplines
- **GIAC Advisory Board Member**, selected for scoring above 90% for GICSP

ADDITIONAL INFORMATION

- Frameworks & Standards: IEC 62443, Purdue Model, ISA99, MITRE ATT&CK for ICS, NIST
- Technical Skills: Python, Linux, Networking (CCNA-level Cisco IOS configuration), Cloud (AWS), Docker, Ansible, VMware, Open vSwitch, OPNsense, OpenPLC, Modbus/pymodbus, OPC UA, Wireshark, tshark, Nmap, CXProgrammer, FUXA HMI, Volatility 3, NetworkMiner
- Incident Response: Memory forensics with Volatility 3 and network forensics with NetworkMiner and Wireshark, grounded in Windows internals and practised through CyberDefenders labs
- Domains: OT/ICS Security, Network Security, Incident Response, Industrial Automation
- Languages: Fluent in English and Chinese, basic Bahasa
